

BULL PRE-SEPARATOR

ITEM NUMBER:

NWA.10100

The SASE® Bull Pre-Separator adds an additional stage of filtration, effectively capturing up to 80% of dust and debris before making contact with the dust extractor. This dramatically increases the dust extractor filter life and lowers the maintenance and frequency of emptying the dust extractor.

TOP FEATURES:

Our Pre-Separator captures up to 80% of particles prior to traveling on to the dust extractor. This minimizes downtime to clean the filters and remove the dust for increased productivity.

TECHNICAL DATA:

- No power required
- Does not reduce airflow
- Machine Weight: 159 lbs (72 kg)
- Dimensions (L x W x H): 48" x 32" x 42"
(1219 x 813 x 1066 mm)
- When used with the Bull 1250, it becomes a 3-Stage Filtration System
- Connects between the grinder and the vac to add a third stage in the filtration process
- Cyclonic action traps up to 80% of dust particles before they reach the dust extractor's filters
- Extends the dust extractor filter life
- Uses the SASE® elongated bag, one included
- Minimizes downtime to clean the filters and remove the dust for increased productivity
- Low-to-ground hose connections to prevent the unit from tipping over
- Includes 10' of 3" flexible, yellow hose (VAC.HS3.00060)
