

PDG 3000

ITEM NUMBERS:

PDG.3000.03, PDG.3000.01

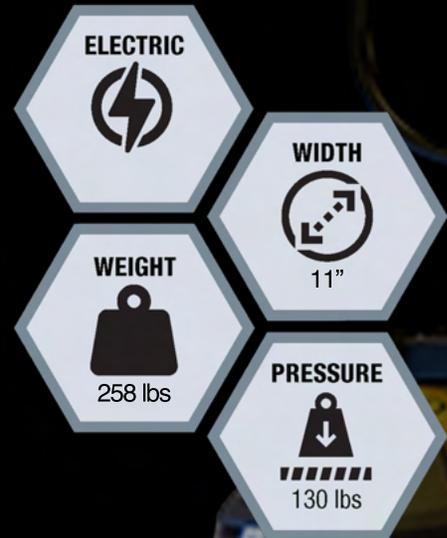

The SASE® PDG 3000 Edge Grinder is the industry's first true, active planetary edge grinder with 3-way adjustable head. It can be adjusted left or right while walking straight, front to back to level and pitched left to right for curled edges. The head also has a low profile designed to operate under shelving and toe kicks.

TOP FEATURES:

By using active planetary on the edges, it blends and matches better with the main field of the floor, compared to a 5" or 7" single rotary head hand grinder. The PDG 3000 has 3 - 5" heads giving the operator a wide variety of tooling choices.

TECHNICAL DATA:

- 3 Phase, 460 Volt, 30 AMP
- 3 Phase, 230 Volt, 40 AMP
- Output: 3 HP (2.2 kW)
- Variable Speed: 850 - 2000 RPM
- Machine Head: (1) 11" Head
- Grinding Width: 11" (279 mm)
- Grinding Pressure: 130 lbs (59 kg)
- Machine Weight: 258 lbs (117 kg)
- Dimensions (L x W x H): 36" x 17" x 38"
- 3-way adjustable head for the perfect grinding position
- Adjustable pivot lever, pitch knob and tilt axle
- Includes (3) 128 mm vulcanized velcro plates
- Connects to SASE® Bull 300 EBS for dust-free operation
