

BULL 175 EBS

ITEM NUMBER:

VAC.BULL175.110V

The SASE® Bull 175 is a compact industrial dust extractor designed for small grinders, hand grinders, and other surface preparation applications. Built for portability without sacrificing performance, the Bull 175 delivers powerful dust collection in a smaller, easy-to-maneuver package. Its compact footprint, long hose, and extended power cord make it an ideal solution for jobs where mobility and efficient dust control are essential.

TOP FEATURES:

Compact, powerful, and built for the jobsite! The Bull 175 delivers 175 CFM of airflow while operating on standard 120V power. Its lightweight, maneuverable design makes it easy to transport and position around the jobsite, while the 23-foot hose and 26-foot power cord provide plenty of working range. The Bull 175 is an ideal dust extraction solution for hand grinders and smaller grinding equipment.

TECHNICAL DATA:

- Single Phase, 120 Volt, 14.5 AMP
- Max Vacuum: 83.1 in H₂O
- Airflow: 175 cfm
- Sound Level: 74 db(A)
- Machine Weight: 136 lbs (62 kg)
- Dimensions (L x W x H): 24" x 24" x 51"
(610 x 610 x 1296 mm)
- 2" hose 23 foot long w/ swivel ends
- OSHA-approved, industrial dust extractor
- Includes 1 primary filter
- Includes 1 secondary HEPA filter
